

# P E S UNIVERSITY

## Department of Computer Science and Engineering

---

### Program Educational Objectives

PEO ID	Remarks
PEO1	Prepare and train students in theoretical foundations to work with cutting edge computing technologies and design solutions to complex engineering problems, making them ready to work in industrial environment.
PEO2	Develop all round skills such as team building, interpersonal skills, leadership qualities in order to effectively communicate with engineering community and with society at large.
PEO3	Promote research culture through internships, research assistantships, research oriented projects, sponsored and collaborative research and enable them to pursue higher studies in computer science and related fields.
PEO4	To inculcate social concern meeting the requirements of prospective employers and to develop an ability to innovate efficient computing solutions for better society.
PEO5	Create professionally superior and ethically strong globally competent employees and entrepreneurs.
